

Summer Semester 2019

Mayss | Ben-Gurion University of the Negev

It was a priceless experience - this has been my first answer to people asking me: how was it? I never thought that living for a period of time in a different country, in different culture, between people of different languages, meeting people from different parts of the world, would be such an inspiring, nurturing thing to experience!

I truly enjoyed being in Innsbruck for four months, learning German, meeting people and exploring the culture and the city! I definitely learned a lot, the most important thing that I learned for myself is that **the more you are open** (for different people, opinions, cultures, beliefs...) **the more you win!**

Win great friendships, more information, win ideas and win a good time in life!

I want to thank the Erasmus+ union for providing us this priceless experience! Last but not least, thank you AIANI team! Thank you for being the best support group for us! You always made us feel welcome and were always there to help and to make us enjoy our stay!

Best wishes to every person that was part of this experience! It was my pleasure meeting you and you made the whole experience much more special!
